

NATIONAL ACCREDITATION PROGRAM FOR BREAST CENTERS

The Breast Disease Management Team of the Curtis & Elizabeth Anderson Cancer Institute Memorial Health University Medical Center

The Breast Disease Management team at the Curtis & Elizabeth Anderson Cancer Institute at Memorial Health University Medical Center is a comprehensive breast center providing evaluation, diagnosis, and treatment for breast disorders that is not only all inclusive, evidence based, and current but offers this care with a critical eye toward compassion and meeting the needs of the women at a time of great stress. The Breast Disease Management Team has a unique translational component being housed on the same campus at the William & Iffath Hoskins Center for Biomedical Research allowing for collaborative studies between our clinical practitioners and our basic science researchers. The Center offers the only surgical practice dedicated exclusively to the care of breast problems as well as a dedicated, full-time Director of Breast Imaging offering ultrasound guided stereotactic and MRI directed biopsies along with a mammographic second opinion service. Support for breast reconstruction is provided by high volume exceptional plastic surgeons. The Anderson Cancer Institute boasts a full-time Certified Genetics Counselor supported by a Genetics Core in our basic science division as well as a biospecimen tissue bank. All other needs of the patients are provided by a team that includes: two, full-time Social Workers and an Oncology Certified Breast Nurse Navigator.
