

## NATIONAL ACCREDITATION PROGRAM FOR BREAST CENTERS

### Breast Care Program Winchester Medical Center

Our fully-accredited program uses a coordinated, multi-disciplinary approach to help patients diagnosed with either benign or malignant problems. From evaluation through follow-up care, the goal of our “center without walls” is to help make the patient’s experience easier and less daunting. Our Diagnostic Center offers digital mammography with full-field digital CAD and stereotactic breast biopsy. Our American Cancer Society Patient Resource Navigator, a registered nurse, provides guidance through cancer diagnosis, treatment options and recovery. Her role is to coordinate care with various physicians a patient will see, assisting in making necessary appointments. A surgeon is generally the first physician you see following breast cancer diagnosis. All surgical treatments are discussed in consultation with other cancer physicians, and specific treatments are recommended. You and your doctor will decide which option is best for you. If radiation therapy is indicated, consultation is arranged with one of our radiation oncologists to discuss the treatment thoroughly. Depending on your situation, your doctor may recommend chemotherapy or hormonal therapy, and will discuss with you the specific drug(s), schedule and duration of treatment as well as side effects. Our 15-bed inpatient oncology unit provides specialty care for acute diagnoses, cancer therapies, and complications. A private medical oncology practice in Winchester participates in clinical research and offers patients access to available clinical trials. Wellspring is our cancer resource and image recovery center, offering products, gifts and support services to address needs during and after treatment.
