

NATIONAL ACCREDITATION PROGRAM FOR BREAST CENTERS

NorthShore University HealthSystem Comprehensive Breast Program Evanston, Glenbrook and Highland Park Hospitals

Welcome to the Breast Health Program at NorthShore University HealthSystem. Our Breast Program sees over 700 breast cancers annually and is the largest academic multispecialty practice to see breast cancer in the state. We were the first breast program in the Chicagoland area to earn full accreditation from the National Accreditation Program for Breast Centers of the American College of Surgeons. With over 80,000 mammograms performed annually at 9 screening sites and the four NorthShore hospitals, we are a major center in the Chicagoland area. We take a multidisciplinary approach to all patients diagnosed with breast cancer. You will see a team of breast specialists throughout your treatment. In addition, we conduct a weekly breast cancer conference where all newly diagnosed breast cancer patients are presented to the breast cancer team to allow discussion of treatment options. Our team is made up of medical oncologists, breast surgeons, radiation oncologists, breast imagers, pathologists, geneticists, plastic reconstructive surgeons and nurses that all specialize in breast care. Our three breast centers at Glenbrook, Evanston and Highland Park Hospital provide digital mammography, breast ultrasound, and breast MRI and are all staffed by fellowship trained breast imagers, breast surgeons and breast nurse specialists. We specialize in cutting edge research and clinical trials. We feel privileged to be your treatment and we want to make your experience with us as comfortable as possible. Please do not hesitate to contact us with any questions or concerns.
